

仮分数のひき算（約分なし） (3)

が にち

$$\frac{7}{6} + \frac{3}{6} = \frac{10}{6} \text{ または } 1\frac{4}{6}$$

なまえ _____

・次の分数の計算をしましょう。
 答えは仮分数または帯分数で書きましょう。

$$\textcircled{1} \frac{21}{3} - \frac{6}{3} = \frac{15}{3}, 5$$

$$\textcircled{9} \frac{25}{3} - \frac{4}{3} = \frac{21}{3}, 7$$

$$\textcircled{2} \frac{23}{7} - \frac{9}{7} = \frac{14}{7}, 2$$

$$\textcircled{10} \frac{50}{6} - \frac{25}{6} = \frac{25}{6}, 4\frac{1}{6}$$

$$\textcircled{3} \frac{20}{4} - \frac{3}{4} = \frac{17}{4}, 4\frac{1}{4}$$

$$\textcircled{11} \frac{35}{9} - \frac{5}{9} = \frac{30}{9}, 3\frac{3}{9}$$

$$\textcircled{4} \frac{21}{7} - \frac{6}{7} = \frac{15}{7}, 2\frac{1}{7}$$

$$\textcircled{12} \frac{15}{8} - \frac{7}{8} = \frac{8}{8}, 1$$

$$\textcircled{5} \frac{19}{9} - \frac{2}{9} = \frac{17}{9}, 1\frac{8}{9}$$

$$\textcircled{13} \frac{10}{4} - \frac{2}{4} = \frac{8}{4}, 2$$

$$\textcircled{6} \frac{30}{4} - \frac{2}{4} = \frac{28}{4}, 7$$

$$\textcircled{14} \frac{13}{10} - \frac{2}{10} = \frac{11}{10}, 1\frac{1}{10}$$

$$\textcircled{7} \frac{23}{3} - \frac{3}{3} = \frac{20}{3}, 6\frac{2}{3}$$

$$\textcircled{15} \frac{21}{7} - \frac{2}{7} = \frac{19}{7}, 2\frac{5}{7}$$

$$\textcircled{8} \frac{25}{8} - \frac{7}{8} = \frac{18}{8}, 2\frac{2}{8}$$

$$\textcircled{16} \frac{26}{4} - \frac{5}{4} = \frac{21}{4}, 5\frac{1}{4}$$
